Business Technology Professionals

Accounting Software

We install, support and train on the industry's leading Accounting software packages. We assist in the development of accounting procedures and provide specialized maintenance support functions. We offer Accounting software and support for Microsoft Dynamics GP and SL and Sage Software's MAS 90 and 200. We also support Crystal Reports, Management Reporter (formerly FRx) and F9 reporting tools. Our in-house professionals, several who are CPAs, provide the knowledge and expertise that allows us to choose a system that best suits your company's needs.

Computer & Network Support

By specializing in small to mid-sized business technology, our certified technicians provide an extensive range of hardware and software solutions including network design, troubleshooting, repairs, virus protection, security, data backup and recovery. We also offer Disaster & Hurricane Contingency Planning.

comprehensive and cost-effective solutions to maximize your company's productivity

Managed Service Plans

State of the art 24/7 network

monitoring, monthly reporting, troubleshooting, and repair. Cut your I.T. spending in half with managed services. TechnologyEdge proactively monitors your network, detects and reports system errors, often correcting them without any disruption to you. If and when escalated support is needed, our help-desk Certified Technicians are standing by.

CRM (Customer Relationship Management)

CRM leverages People, Process and Technology to create customers for life. Whether you have a few employees or a few thousand, CRM can benefit your customer-driven business.

With CRM your business can gain a competitive edge. We have a thorough methodology that allows us to have industry-leading project success, regardless of budget or business size. From developing a CRM strategy, selecting the appropriate software, and implementing your CRM solution, we are the CRM experts.

improved operations resulting in increased productivity within your organization

Custom Programming & Collaboration Solutions

We realize no two businesses are alike, therefore it is impossible to offer one type of software or service and expect it to suit every client's needs. Business Intelligence Dashboards and SharePoint communication and collaboration portal pulls in data from numerous determined sources to display real-time information customized to each department or team member's individual needs.

Training and Support

Our firm is committed to the development of individual competencies, which is a direct contribution to your organization's productivity. We develop the best performance-based training for our clients. Our hands-on approach focuses on enhancing your knowledge that will enable you to achieve complete utilization of your current and future technology resources.

Empower your team & maximize your I.T. investment through education

Technology is a tool that enables organizations to become more efficient and gain a competitive edge. Our professionals have the knowledge, experience & expertise to ensure you get the most from your technology budget. **Your Business, State of the Art Technology, Our Expertise... Better Together**
